Four-dimensional space - Wikipedia The geometry of four-dimensional space is much more complex than that of three-dimensional space, due to the extra degree of freedom. Just as in three dimensions there are polyhedra made of two dimensional polygons, in four dimensions there are 4-polytopes made of polyhedra.

Four-Dimensional Geometry -- from Wolfram MathWorld Four-dimensional geometry is Euclidean geometry extended into one additional dimension. The prefix "hyper-" is usually used to refer to the four- (and higher-) dimensional analogs of three-dimensional objects, e.g., hypercube, hyperplane, hypersphere. The Fourth Dimension and Non-Euclidean Geometry in Modern ... In this groundbreaking study, first published in 1983 and unavailable for over a decade, Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception—the curved spaces of non-Euclidean geometry and, most important, a higher, fourth dimension of space—were central to the development of modern art. Fourth Dimension - Math Forum One way to understand what the fourth dimension "looks like" is to carefully examine what the 3rd dimension looks like to "creatures" living in a 2-dimensional world. If we can understand this, then we can understand some of what the fourth dimension looks like to us creatures living in the 3-D world by using appropriate analogies.

Fourth dimension in art - Wikipedia "Overview of The Fourth Dimension And Non-Euclidean Geometry In Modern Art, Revised Edition". MIT Press; Jouffret, Esprit (1903). *Traité Élémentaire de géométrie à quatre dimensions et introduction à la géométrie à n dimensions* (in French). Paris: Gauthier-Villars. History of Thought: Four Dimensional Geometry Also, the idea that three-space may be curved implies that it is lying in some other dimension—a fourth dimension.
